- ◆ Pinstriping

What you need to know

In effort to cut cost and bring down premiums many insurance companies have developed direct repair programs. These programs are groups of collision repair facilities recommended by your insurance provider and packaged to the consumer as preferred, recommended, ect. Many of these programs have possitive advantages for the consumer in that in some cases quality of repair and shop cycle times are improved. The down side is that in many cases the insurance company asks for discounts and or consessing from the collision repair facility. In exchange, the insurance company promises to recomend repair work to the shop. This type of relationship does not always put the customer's best interest at hand. At Auto Reflection we approach each vehicle one at a time. Negotiations with the insurance company are soley based on what it takes to restore your vehicle to pre-accident condition. It is Auto Reflection's opinion that you are the best person to select a qualified repair facility for your collision repair needs. This is also your right protected by Colorado law.

What to do in case of an accident

For your convenience, print the information on this page and keep it in a safe place with your registration and proof of insurance (within your vehicle). If an accident occurs, perform the following steps:

1. Stop, turn the ignition off, turn your emergency flashers on and remain CALM.
2. Determine if anyone has been seriously injured, call 911 or your local emergency number ___ - ___ - ___ (write your local emergency number here). DO NOT move individuals that are injured unless absolutely necessary.
3. Complete this step as required by YOUR City or State laws. If there are no injuries call law enforcement authorities as needed ___ - ___ - ___ (write number here). File an official accident report with the police. Report the accident to the Department of Motor Vehicles. You can obtain an accident report at any police station, fill it out & mail to the Department of Motor Vehicles. Always keep a copy for your records.
4. If a vehicle is creating a hazardous condition, position it away from oncoming traffic. Burning vehicles should be abandoned.
5. Do not discuss the circumstances of the accident with anyone except an Officer of the Law or your insurance company representative.
6. Notify your insurance company immediately. Settling the claim yourself, could produce severe future repercussions.
7. Notify your insurance agent of the accident and that we are going to repair your vehicle.

Obstacles in the road to repair

Do not let your car go unrepaired. Mis-aligned vehicles can cause uneven tire wear, leaving you with reduced traction and an unsafe vehicle. Unseen structural damage can make your vehicle unsafe to drive as well. Dents & rust spots always lower the value of your vehicle. In the long run, returning your vehicle to it's pre-accident condition is the only road to travel.

Do not allow your vehicle to be towed to a facility you are not familiar with. Do not authorize repairs by signing a towing release unless you have decided to have your car repaired by the facility your vehicle is being towed to.
